## From the CEO's Desk:

Dear Valued ThunderPlus Community,

Thank you for the overwhelming response to the inaugural edition of our ThunderPlus newsletter, Thunder Buzz! Your enthusiasm and feedback have been truly inspiring.

As we prepare to release the second edition, we are excited to bring you more curated content, insightful updates, and exclusive offers. Your engagement is at the heart of Thunder Buzz's success, and we are committed to making each edition even better.

This edition highlights our new partnerships with Tata Motors, MG Motors, Go Zapp, and Oyika, which are crucial in accelerating EV adoption in India. We have also launched India's first-ever EV-ready post office in Sainikpuri, Secunderabad, and initiated projects to promote faster EV adoption. These efforts reflect our dedication to a greener, eco-friendly future.

We value your feedback and encourage you to keep sharing your thoughts with us. Your insights help us tailor the newsletter to better meet your needs.

Thank you for your continued support. Together, we will keep the spirit of innovation alive and create a future filled with energy and possibilities.

Warm regards,

Rajeev YSR  
CEO  
ThunderPlus

# India's first EV-ready Post Office

India's first EV-ready post office has opened in Sainikpuri, Secunderabad, powered by ThunderPlus. This initiative represents a significant step towards a greener future, enhancing sustainability in postal services. With this launch, we are driving towards more electric miles, zero emissions, and a brighter, eco-friendly tomorrow.

**NEW DELHI**  
**TM to expand EV infra**

Tata Motors on Wednesday said it has tied up with Delta Electronics India and Thunderplus Solutions to set up charging infrastructure for its range of electric commercial vehicles (CVs). As part of the MoU inked between the parties, 250 new fast-charging stations for electric commercial vehicles would be set up across the country. Strategically located in over 50 cities, including Delhi, Mumbai, Chennai, Bengaluru, among others, these new charging stations will significantly increase the existing network, Tata Motors said. TATA MOTORS ON Wednesday said it has tied up with Delta Electronics India and Thunderplus Solutions to set up charging infrastructure for its range of electric commercial vehicles (CVs). As part of the MoU inked between the parties, 250 new fast-charging stations for electric commercial vehicles would be set up across the country.

**Tata Motors signs MoU with Delta Electronics and Thunderplus Solutions**

**C**HANDIGARH/LUDHIANA: Tata Motors, India's largest commercial vehicle manufacturer, today announced that it is collaborating with Delta Electronics India and Thunderplus Solutions Pvt Ltd to expand charging infrastructure for its electric commercial vehicles by setting up 250 new fast charging stations across the country. Strategically located in and around over 50 cities, including Delhi, Mumbai, Chennai, Bengaluru, Pune, and Kochi among others, these new charging stations will significantly increase the existing network of 540 commercial vehicle charging points. Speaking about this collaboration, Mr. Vinay Pathak, Vice President & Business Head - SCV&PU, Tata Motors Commercial Vehicles, said, "Our endeavour is to make emission-free cargo transportation easily accessible. Expanding the available charging infrastructure on high-use routes will encourage more customers to opt for electric commercial vehicles and improve vehicle uptime resulting in higher revenues and better profitability, while contributing towards a cleaner, greener environment. Installing fast chargers at our dealerships makes it convenient for them to gain access at a familiar location with reliable charging facility."

## Inspiring Partnerships

In a remarkable journey where innovation meets legacy, ThunderPlus and MG Motors India forge a partnership destined to redefine the roads of tomorrow. We bring to you a fusion of speed, efficiency, and unparalleled elegance. As we clasp hands with MG, every charge we take, every road we conquer, resonates with a promise of a greener, grander future.

Feel the pulse of progress with every journey—because together, we aren't just driving, we are leading the charge towards a sustainable revolution.

## Fueling the Green Revolution

We're thrilled to share that Thunder Plus, a trailblazer in electric vehicle charging infrastructure, has joined forces with GoZapp to transform EV charging across India!

This groundbreaking partnership is set to expand the electric vehicle charging infrastructure significantly.

We're focusing on:

- ▶ Parking and Charging Solutions
- ▶ Public Charging Solutions
- ▶ Charger Sales and Much More

## **Together, we charge ahead**

+

Thunder Plus has partnered with Oyika to expand EV charging infrastructure in Southeast Asia. Thunder Plus will provide fast chargers for two- and three-wheelers, which will be integrated into Oyika's battery swapping stations. This collaboration aims to boost EV adoption and improve charging solutions in the region.

## **At Flixbus roundtable**

In the recently concluded roundtable organized by Flixbus, our CEO, Rajeev YSR, spoke about revolutionizing transportation with our innovative approach to three-wheelers. As a leading manufacturer and operator, our mission is to drive sustainable mobility solutions that empower communities and businesses alike.

# Catching the Buzz

### Hyderabad: First Post Office EV Charging Station Launched By Thunder Plus

Thunder Plus, a prominent Indian electric vehicle (EV) charging company, has announced a strategic partnership with Oyika, a Singapore-based battery swapping company. The collaboration, formalized through a Memorandum of Understanding (MOU), aims to broaden Thunder Plus's presence in the Southeast Asian market.

Under the terms of the agreement, Thunder Plus will introduce its full suite of EV charging products, including cutting-edge fast chargers for two-wheelers and three-wheelers, into Oyika's battery swapping stations throughout Southeast Asia. This integration is expected to enhance the EV infrastructure across the region.

The partnership marks a significant step for Thunder Plus in expanding its export market and establishing a strong presence in the burgeoning EV sectors of Indonesia, Thailand, Malaysia, Cambodia, and Singapore. The collaboration will also facilitate the exchange of technological expertise and business networks between the two companies, with the goal of accelerating EV adoption in Southeast Asia.

Rajeev YSR, CEO of Thunder Plus, expressed enthusiasm about the partnership: "We are excited to work with Oyika to deliver our advanced charging solutions to Southeast Asia. This partnership not only improves convenience for EV users but also supports our global mission to promote sustainable transportation."

### Tata Motors signs MoU with Delta Electronics and Thunderplus Solutions to install 250 fast-charging stations

Tata Motors has announced its strategic partnership with Delta Electronics and Thunderplus Solutions to install 250 fast-charging stations across the country. The collaboration aims to enhance the EV infrastructure and support the growing demand for electric commercial vehicles.

The partnership involves the installation of 250 fast-charging stations across various cities, including Delhi, Mumbai, Chennai, Bangalore, Pune, and Kolkata. These stations will significantly increase the charging network for 150 commercial vehicle categories.

A common concern, range and recharging problems, among other industries, are increasing the adoption of commercial EVs for the last-mile deliveries to reduce their carbon footprint. Based on the understanding of commercial EV requirements, Tata Motors will implement optimal locations and ensure charging for setting up these fast-charging stations. Delta Electronics will supply the necessary hardware, and Thunderplus Solutions will install and operate them.

Visay Pothan, Vice President and Business Head - SCVPs, Tata Motors Commercial Vehicles, said, "Expanding the available charging infrastructure on high-traffic routes will encourage more customers to opt for electric commercial vehicles and improve vehicle uptime, resulting in higher revenues and better profitability, while contributing towards a cleaner, greener environment."

He added that this great start-up partnership is expected to open the way to other locations with related charging facilities, he added.

Rajeev YSR, Managing Director, Delta Electronics India, said, "This collaboration with Tata Motors and Thunderplus allows us to contribute significantly to India's electric cargo ecosystem."

Rajeev YSR, CEO Thunderplus Solutions Pvt Ltd, added, "Our focus is on enabling electric commercial vehicles customers with top-notch charging solutions that ensure convenience and reliability."

Tata Motors offers the Axi EV - India's most advanced four-wheel e-cargo solution for last-mile deliveries. It is supported by over 150 Electric Vehicle Service Centers across the country and is equipped with an advanced battery management system, third-party telematics system and other aggregates for best-in-class uptime.

Leveraging the immense capabilities of the Tata iCEV fleet, the Axi EV benefits from collaboration with relevant Tata Group companies and partnerships with the country's leading fleeters to offer customers a holistic e-cargo mobility solution. The Axi EV can be purchased at all Tata Motors commercial vehicle dealerships.

### Mail meets mileage: India Post stamps out range anxiety, enters EV charging

The origins of postal service in India trace back to 1796, during the reign of Alauddin Khilji, who later was used for deliveries. In 2016, Warren Hastings introduced the Company Mail, which eventually evolved into the modern India Post through various transitions. Today, this grand old institution is embracing a new journey into electric vehicle (EV) charging.

Thunder Plus, an EV charging company, has teamed up with the India Post to launch an EV charging station at a post office in Sainikpuri, Hyderabad. This collaboration aims to expand EV charging infrastructure to more post offices and public locations across the country, fostering a green ecosystem and reducing range anxiety.

### Thunder Plus and India Post Unveil EV Charging Station in Hyderabad Post Office

The project is the first of its kind in India and aims to make EV charging more accessible, with plans to equip additional post offices and public campuses across the country with similar solutions.

September 12, 2024. By Aishwarya

Thunder Plus has announced the launch of an EV charging station within a public post office in Hyderabad, in collaboration with the Department of Post, Government of India.

The station is located at the Sainikpuri Head Post Office in Hyderabad and was inaugurated on September 10, 2024.

The event was attended by Sreelatha, Chief Postmaster General of Telangana, along with Rajeev YSR, CEO of Thunder Plus Charging Solutions.

Rajeev YSR expressed that this initiative is an important step towards promoting sustainable mobility in India. He noted that with India Post's extensive network of infrastructure, converting post offices into EV charging hubs presents opportunities for expanding clean energy infrastructure.

The project is the first of its kind in India and aims to make EV charging more accessible, with plans to equip additional post offices and public campuses across the country with similar solutions. According to Sreelatha, while India is progressing in EV adoption, infrastructure challenges remain.

She highlighted the importance of collaboration between sectors like real estate, electricity, and technology to overcome these hurdles while keeping costs low for consumers. The initiative is viewed as a step toward addressing these challenges through partnerships.

The event also underscored how this collaboration aligns with the Indian Postal Service's commitment to sustainability and public service. Thunder Plus shared its vision of enhancing the EV charging infrastructure in India through this partnership.
